

AUGER FILLER

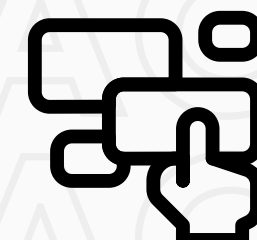

**Accurate
Screw Filling**

**Consistent
Quality**

**International
Standards**

**Easy to
Operate**

An Auger Filler is a type of automated packaging equipment used to dispense powdered, granulated, or viscous products into containers. It operates using a rotating auger screw to accurately measure and transfer material into packaging. Ideal for industries like food, pharmaceuticals, and chemicals, auger fillers ensure precise and consistent filling, minimizing waste and enhancing efficiency in the production process.

Auger Fillers include adjustable filling volumes, high-speed operation, and precise control over powder flow, ensuring accurate dosage. They are also easy to clean and maintain, making them ideal for industries requiring hygienic standards.

An Auger Filler is used for filling powdered and granular products like flour, spices, sugar, coffee, and detergents.

Easy to Operate

Designed with simplicity, our machine features an intuitive smart interface and straightforward controls, ensuring easy operation for all experience levels.

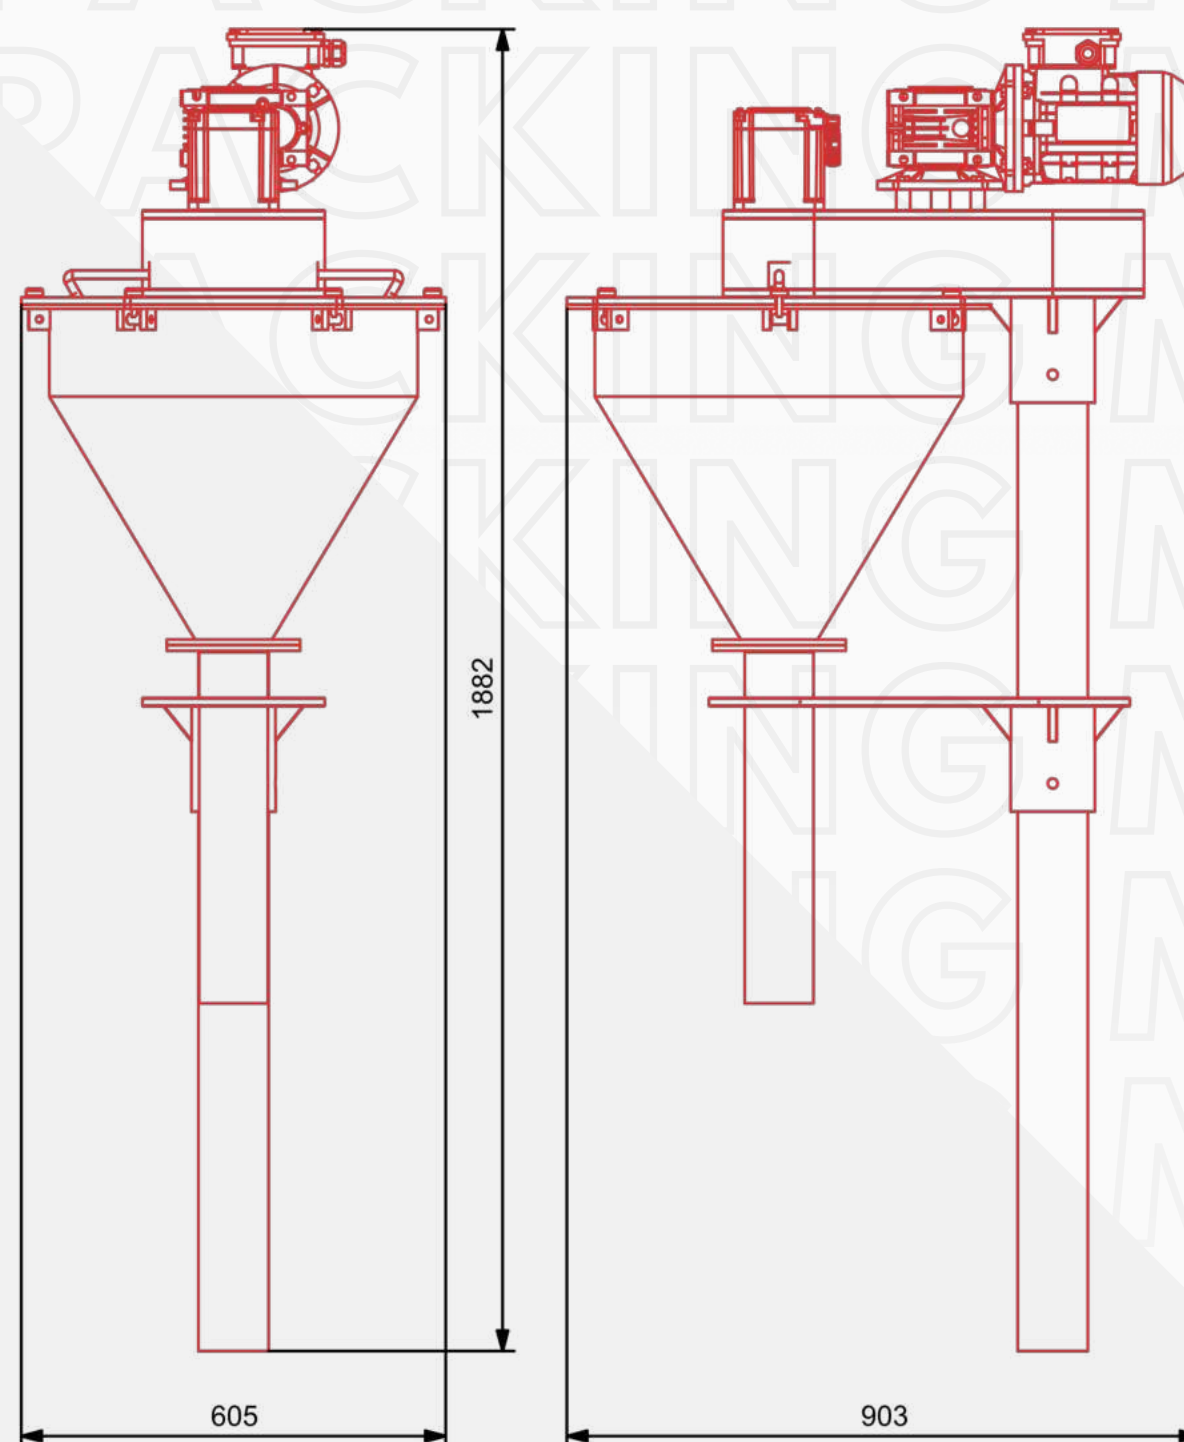

Easy Maintenance

With a focus on convenience, our machine is engineered for easy maintenance, featuring accessible components and straightforward service procedures.

Rapid Tech Support

Benefit from our 24*7 rapid tech support, offering prompt assistance and solutions to minimize downtime and keep your machine running smoothly.

DIMENSIONS

TECHNICAL SPECIFICATIONS

Hopper Capacity	15 Ltr (Depend On Product)	Contact Part	Stainless Steel
Filling System	Servo Screw Filling	Power	220v AC (Single Phase)
Quantity to be Filled	10 Gram To 1000 Gram (Depending On Product)	Operation	Servo Based
Machine Weight	~ 150 Kg	Product Compatibility	Powder Form
Structure	M.S. Duly Powder Coated	Error In Weight	+ /- 1%

*The above mentioned values are indicative and can be modified at any time at the discretion of the company.
