

# INDUCTION CAP SEALER

**Handy  
Equipment**

**Secured  
Sealing**

**Easy to use**

**Optional  
Gas Flushing**

**Consistent  
Quality**

**International  
Standards**

An Induction Cap Sealer Machine is used to securely seal containers with induction-welded aluminum foil liners, ensuring tamper-proof packaging. It uses electromagnetic induction to heat the foil liner, causing it to bond tightly with the container's opening. This process provides a strong, airtight seal that extends product shelf life and prevents contamination. Ideal for industries like food, pharmaceuticals, and cosmetics, it ensures efficiency, safety, and reliability in packaging.

The Induction Cap Sealer Machine features tamper-evident sealing, high-speed operation, adjustable settings, energy efficiency, and compatibility with various container types for reliable and low-maintenance packaging.

The Induction Cap Sealer Machine is widely used in the food, pharmaceutical, cosmetic, and chemical industries for sealing bottles and containers to ensure product safety and freshness.

## TECHNICAL SPECIFICATIONS

Model	<u>iCAP-Mini</u>	<u>iCAP-Pro</u>
Power	Single Phase AC	Single Phase AC
Head Size	90 mm	120 mm
Cap Size	20 - 90 mm	20 - 120 mm
Sealing Speed	4 To 8 m / min	4 To 8 m / min
Wad Property	Heat Sealable Wads	Heat Sealable Wads
Sealing Strength	Adjustable with Timer	Adjustable with Timer
Machine Size (L x W x H)	340 x 280 x 140 mm	340 x 280 x 140 mm
Machine Weight	3 kg	3 Kg
